- 1\* Or else mm.
- 2\*  hardly ; hieratic ?
- 3\* After the mark of division  after N rest of l. empty. Next l. Spell 47 follows.   
  
N
- 4\*  in 201 e follows.
- 5\*   204 b precedes.
- 6\* My text assumes that the words   which precede   etc. were the end of a l. in the original of B16C and that   which precedes  (204 c) was a ditto. of this original due to changing line. The alternative is to take   as beginning of an original line. In this case these words would correspond to   of 202 c. and   preceding  would not be ditto. The former supposition seems preferable, because it yields lines of more equal length.
- 7\*  in 201 h follows.
- 8\* The line which followed in the original of B16C began with a ditto. due to changing line. See the reconstruction.
